Whisper® Acoustic Panels

## What are Whisper® Acoustic Panels?

Whisper® Acoustic Panels help to safely reduce noise, make music sound better, allow people to speak and hear one another, and contribute to a safer and more productive work environment, indoors, or outside. These lightweight panels can be hung from ceilings, attached to walls, and easily shaped for an attractive, creative solution to sound absorption.

Whisper® Acoustic panels use a honeycomb-like matrix of networked closed cells which efficiently absorb noise.
